DETAILED ACTION

Election/Restrictions

Claim 1 is generic to the following disclosed patentably distinct species:

Species I corresponds to Fig. 1.

Species II corresponds to Fig. 8.

Species III corresponds to Figs. 9 & 17.

Species IV corresponds to Fig. 11.

Species V corresponds to Fig. 12.

The species are independent or distinct because all species have circuit configuration different from each other. Specifically, species II does not require a communication interface 29 as required by species I. Species III requires recording media interface 31 which is not required by both species I & II. Species IV does not require a communication means 51, instead requires a communication means 36 attached to the recording medium which is not required by species I, II & III. Species V requires image processing means 34 which is not required by species I, II, III and IV.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
